## **DETAILED ACTION**

### ***Current Status of 10/549905***

1. The claim objections raised in the office action have been overcome by the amendment filed 3/21/2008.
2. The objections to the specification have been overcome by the amendment filed 3/21/2008.
3. The rejections under 35 U.S.C. 112 1<sup>st</sup> and 2<sup>nd</sup> paragraph have been overcome by the amendment filed 3/21/2008.
4. The oath is considered defective. In the petition decision of February 4, 2008, the application was revived, but applicants have not submitted enough evidence to constitute a written refusal. Item (2) of 37 CFR 1.47(a) is not yet satisfied.

### ***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Each of the R groups is not an acidic or retinoic residue, but an alkenyl group. When one reads claim 1, it is unclear to the location of the acyl group. In the instant set of claims, the acyl group is part of the polyamine core. In addition, claim 1 contains functional language ("having pharmaceutical properties") which renders the claim unclear as to whether it is a compound or a composition claim. The scope of the claim is currently unclear as a result of the presence of functional language. Appropriate correction is required.

***Information Disclosure Statement***

7. The information disclosure statement filed 3/21/2008 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the information referred to therein has not been considered.

***Conclusion***

8. No claims are allowed.

9. The closest prior art is reported by Manfredini et al. (*Journal of Medicinal Chemistry*, **1997**, 40, 3811-3857, cited in IDS) teach compound 14 (page 3852). This compound fails to anticipate or render obvious a compound of claim 1 because the linker between the retinoids is a  $\text{NH}(\text{CH}_2)_3\text{NH}$  linker. This linker is not one of the polyamines of claim 1.

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
